eBehavior CMS™

CREATE A BETTER LEARNING ENVIRONMENT

eBehavior CMS™ (Classroom Management System) provides schools with a powerful solution to create a positive learning environment that increases teacher efficiency, improves student responsibility, and strengthens communication between parents, students, teachers, and faculty.

eBehavior CMS provides schools with a web application that helps implement and track a consistent, school wide behavior policy focused on positive recognition. eBehavior CMS encourages teachers to recognize good behavior, identify only the most disruptive activities, and to discipline those actions consistently across the student body.
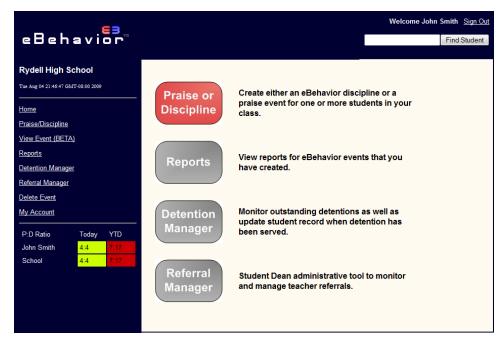

Schools that implement eBehavior CMS realize the following benefits:

- An environment conducive to learning.

- Consistent application of the school's discipline policy.

- Improved communication between parents, students, teachers, and faculty.

- A positive environment as a result of the school's focus on good behavior.

- Teachers are more consistent in their support of the school's discipline policy.

- Teachers and faculty are more efficient in administering discipline policy.

eBehavior CMS™

DETAILED FEATURE LIST

Feature	Description
Accessible Anywhere	Web application allows registered users to access eBehavior CMS from any computer without installing any software.
Discipline Event Types	eBehavior supports praises, detentions, and referral event types. The types of events are configurable by the individual school. Some examples of praises include "Did Well on Test", or "On-Task" whereas discipline events might include "Tardy", or "Academic Dishonesty"
Praise Monitor	Every user of eBehavior CMS can see his or her daily and yearly ratio of praises to detentions assigned as well as the school's overall ratio; this supports each individual to work together to realize the school's vision for a positive learning environment.
Detention Events	Students receiving a detention event are automatically assigned a 1-day detention. An event that has been flagged as a referral can have the detention quantity changed in the Referral Manager (see below).
Class Rosters	Teachers can quickly find their students by selecting their class and then one or more students. eBehavior can integrate with your school's information system so that your teachers see accurate and up-to-date class rosters.
Automatic Parent Notification	Parents can receive an email or text message when their student receives a praise, detention, or referral. Emails contain the details of the event, the date, and the teacher involved; text messages provide an overview.
Parent/Student Portal	Parents and students can stay up-to-date with student progress by logging into the secure eBehavior Portal. The Portal provides parents with the ability to register one or more students (from one or more schools) and monitor their performance. it also provides a dashboard view to look at overall performance as well as detailed eBehavior reports.
Detention Manager	eBehavior CMS allows designated users to track and manage detentions. Those with appropriate privileges (such as the teacher, dean or campus aides) use this feature to clear detentions as they are served.
Referral Manager	Similar to the Detention Manager described above, Referral Manager allows the dean (and whoever else has privileges) to manage referrals. This includes the ability to adjust detention quantity, enter notes, and document other responses, such as parent conference, etc.
Reports	eBehavior provides a powerful set of reports that may be generated by teachers and administrators. The current set of reports include: • Today's Events (by teacher) • Today's Events (All Teachers) • Active Detentions (My Classes) • Active Detentions (All) • Active Detentions (Anonymous Student Posting) • Active Praise (Anonymous Student Posting) • Events by Student • Daily Summary (Yesterday)

eBehavior™

▶ BENEFITS

- Consistent School Wide Behavior Policy
- Improved & Timely Communication
- Measured Student Accountability
- Teacher Efficiency
- Positively Reinforced School Culture

Start Today

Work with eBehavior to evaluate your school wide behavior policy goals and turn your vision into reality.

After the evaluation, complete the configuration survey and have your school's version of eBehavior up and running by the end of the week.
